

WILL MY VOTE COUNT?

MAYBE.

Pennsylvania will be buying new voting machines very soon; the old punch card and lever machines will be gone. Our tax dollars will be paying for these new machines, and our votes will be on the line.

Let's choose the best machines available. We support electronic machines which produce a printed copy of how we voted. We also support depositing those copies into a ballot box where they will be considered official ballots, for counting and recounting.

Computers are good for quick tallies, but we can't count the bits and bytes. Only secure paper can provide for a secure recount and help keep our elections honest.

Be certain your vote will count. Please join us.
