

NO MORE LEVERS?

Pennsylvania Chooses New Voting Machines

No longer will we hear the curtains closing behind us as we trust our votes to the old lever machines. Pennsylvania very soon will spend a lot of our tax dollars on new machines.

As we move into the future, we must be certain we can trust the replacement machines. Some machines can be tampered with. Others produce results that may

be changed. Still others can print out a record listing exactly how you voted. Some may have thrown elections, with any proof irretrievable.

Have a voice in Pennsylvania's voting machine choice. Tell your elected officials that the only electronic machines we will support are those which print a copy that we can verify and then drop into a ballot box for an official recount.

**Let's spend our tax dollars wisely.
