

# No more lever machines.

## What will replace them?

As we say goodbye to our lever machines, we must be certain we can trust their replacements.

Please tell your decision makers, emphatically, that any electronic machine purchased *must* produce a paper printout of how we voted (preferably one difficult to tamper with) which, once you verify it, becomes the official recountable ballot that you deposit in the ballot box before leaving the polling place.

**We'll miss those levers.**

**Let's not miss the boat.**
